

COVID-19 Best Practices for Golfers

While much of normal everyday life is being altered during the COVID-19 pandemic, the one thing that everybody should still be able to enjoy is the game of golf. So far, golfers may continue to swing away. Below are a list of best practices courtesy of numerous other courses nation-wide that outline how golfers can best enjoy the sport while being safe and courteous to others enjoying the environment.

- All flagsticks have been retrofitted with Styrofoam inserts to minimize golfer contact with flagsticks and cups
- Keep flagsticks in the hole to avoid possibly spreading germs on them
- If a ball comes to rest within a grip-length of the hole, deem it holed and pick up
- Practice Social Distancing. One rider per golf cart or only ride with people you live or came with
- After each cart is returned from use, the steering wheel and seats will be cleaned and sanitized before reuse
- Ball Washers on tee boxes are closed for use
- Think about walking rather than taking a golf cart
- The Pro Shop is open ONLY to transact – only two (2) people at a time allowed inside
- NO GATHERING INSIDE OR OUTSIDE
- Wash your hands frequently!!
- PLAY GOLF WITH YOUR FAMILY! It's one of the best ways to spend time together right now
